# DEPARTMENT OF BUILDING INSPECTION

## CODE ADVISORY COMMITTEE

### FIRE AND LIFE SAFETY SUBCOMMITTEE

#### AGENDAS

1994 – 2001

Prior to 1995, the Code Advisory Committee and its Subcommittees were under the Bureau of Building Inspection, which was a division of the Department of Public Works. However, in the 1994 General Election, the voters approved the establishment of a Department of Building Inspection. The Code Advisory Committee and its Subcommittees were thereafter under that Department.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the implementation of the proposed changes. It details the steps involved in the transition process, from the initial planning phase to the final execution. This section also addresses the potential challenges and risks associated with the changes, providing strategies to mitigate them.

3. The third part of the document discusses the impact of the changes on the organization's overall performance. It presents data and analysis showing the positive effects of the changes, such as increased efficiency and cost savings. This section also highlights the importance of ongoing monitoring and evaluation to ensure the changes continue to deliver the desired results.

4. The fourth part of the document provides a summary of the key findings and conclusions. It reiterates the importance of the changes and the need for continued commitment and support from all stakeholders. This section also includes recommendations for future actions and a timeline for implementation.

5. The final part of the document is a conclusion that summarizes the main points of the document. It emphasizes the importance of the changes and the need for continued commitment and support from all stakeholders. This section also includes a call to action, encouraging all stakeholders to work together to ensure the successful implementation of the changes.

THE UNIVERSITY OF CHICAGO  
DEPARTMENT OF CHEMISTRY  
RESEARCH REPORT NO. 1000

1. The first part of the report describes the synthesis and properties of a new class of polymers. The polymers are prepared by the reaction of a monomer with a catalyst. The properties of the polymers are studied by various methods, including infrared spectroscopy, nuclear magnetic resonance, and viscometry. The results show that the polymers have a high molecular weight and a narrow molecular weight distribution. The polymers are also found to be soluble in a wide range of solvents.

TABLE I	
Properties of Polymers	
Sample	Properties
1	High molecular weight, narrow distribution, soluble in many solvents.
2	High molecular weight, narrow distribution, soluble in many solvents.
3	High molecular weight, narrow distribution, soluble in many solvents.
4	High molecular weight, narrow distribution, soluble in many solvents.
5	High molecular weight, narrow distribution, soluble in many solvents.
6	High molecular weight, narrow distribution, soluble in many solvents.
7	High molecular weight, narrow distribution, soluble in many solvents.
8	High molecular weight, narrow distribution, soluble in many solvents.
9	High molecular weight, narrow distribution, soluble in many solvents.
